SKILLS

Data Analysis & BI: Power BI, Advanced Excel (PivotTables, Power Query, XLOOKUP/VLOOKUP), Business Intelligence, Dashboard Development, Automated Reporting

Programming & Databases: Python, SQL, PostgreSQL, MySQL, SQLite, R, Data Analytics

Data Engineering: ETL Pipelines, Data Integration, Data Modeling, Data Validation, Data Quality, APIs

EXPERIENCE

Automation Data Analyst

Mount Pleasant, WI

Foxconn Industrial Internet

Feb. 2026 – Present

- Developed Python-based simulation and scheduling algorithms for warehouse and dock operations, reducing simulated truck unloading time by 20%.
- Built an automated Python pipeline integrating multi-source SMT equipment data for weekly performance reporting, enabling bottleneck identification and equipment utilization monitoring.
- Translated cross-functional business requirements into data workflows, system requirements, integration specifications, and technical documentation for manufacturing automation projects.

Data Science Intern

Remote

MyEdMaster

Oct. 2024 – Nov. 2025

- Engineered Python-based adaptive testing algorithms to personalize learning pathways across 15+ educational units, reducing student learning time by 35% through automated knowledge-gap identification.
- Developed automated data pipelines and API integrations for content generation, tagging, and classification, enabling scalable data processing across the learning platform.
- Authored 10+ system and process documentation materials to support internal alignment, onboarding, and workflow standardization.

Actuarial Analytics Intern

Taipei, Taiwan

BNP Paribas Cardif

Jun. 2024 – Aug. 2024

- Automated actuarial reporting workflows using Python and SQLite, processing 50K+ policy records and reducing reporting turnaround time by 33%.
- Built reusable data validation and reporting pipelines to improve operational efficiency and reporting accuracy.
- Analyzed reserve and policy data to support actuarial decision-making and reporting transparency.
- Collaborated cross-functionally with actuarial teams to translate business requirements into analytical workflows.

PROJECTS

Logistics Performance Analytics Dashboard

Mar. 2026

- Built a Power BI dashboard tracking throughput, waiting time, and resource utilization across warehouse and logistics operations.
- Integrated multiple operational datasets and developed KPI-based visualizations to support scheduling and resource-allocation decisions.

Life Insurance Valuation & Reinsurance Analytics Platform

Sep. 2025

- Developed a modular Python data pipeline integrating policy and mortality datasets to automate reserve valuation, reinsurance calculations, and multi-report generation.
- Built an interactive analytics dashboard with portfolio KPIs, policy drilldowns, and scenario testing to support reserve, mortality, and reinsurance analysis.

EDUCATION

Michigan State University

East Lansing, MI

Master of Science in Statistics

Aug. 2023 – May 2025

National Sun Yat-sen University

Kaohsiung, Taiwan

Bachelor of Science in Applied Mathematics

Aug. 2019 – May 2023

EXAMS AND CERTIFICATIONS

Actuarial Exam P & FM | Society of Actuaries

Jun. 2025

Advanced Learning Algorithms | DeepLearning.AI

Nov. 2024

Google analytics individual qualification | Google Digital Academy (Skillshop)

Dec. 2023
